Frederick & Sons Design Group

Dear Hiring Manager

Having recently learned of the React Developer Job opportunity, I wanted to contact you to convey my interest. I am a running student from BUBT, Rupnagar, Dhaka, earning my Bachelor of Science in Computer Science and Engineering and I'm looking to apply my skills and abilities to this company. I believe that my qualifications closely align with the type of candidate you are seeking.

The value I will bring to your organization includes an extensive skill set developed through my experiences. I am well-versed in communication and time management. I can contribute to positive improvements and team achievements through my leadership and teamwork abilities. I can perform my tasks with proper planning and strive to execute each task according to my plan. I have completed numerous projects from scratch to enhance my knowledge as a React developer. Even though my professional experience does not primarily include working in a corporate setting, I have polished my talents through personal initiatives. These experiences have given me important insights into the software development life cycle, client communication, and delivering high-quality solutions on time. Here is Github my link. If you have time, you can visit my page to see my projects. I am capable of expanding my knowledge in critical situations and handling difficult situations

As my enclosed resume will demonstrate. I maintain the planning skills and abilities that you require in a new React developer. Thank you for your consideration. I look forward to discussing the possibility of joining your company's team. I am available whenever you need me and can be reached via email and phone number.

Best Regards

Ismat Jahan Bijori
